

# DATA SHEET

## DUPLICA DIGITAL - CANON™

ITL's Duplica Digital inks are water-based pigment inkjet inks which have been designed specifically for use with the Canon W8200, W6400 and W8400 series wide-format printers. Duplica Digital inks feature identical colour reproduction characteristics to the original inks which means they are fully interchangeable and can be installed either individually or as a full set, and require no pre-installation printer flushing. After conversion there is no requirement to change any of the print driver or RIP settings and no need to reprofile the printer. ITL Duplica Digital inks are available either in bulk or in professionally filled, single-use 330ml ink cartridges and offer users considerable cost savings whilst maintaining the highest quality levels of printed output.

### COMPATIBLE PRINTERS - CANON™

Canon™ W8200P, W6400P, W8400P

### MAXIMUM RELIABILITY

Extensive testing is carried out on all ITL inks during their development and production to ensure they are up to the most demanding of print jobs.

- Full hardware and UV fade resistance warranties.\*\*
- Print quality and printer performance standards maintained.
- Manufactured to strict ISO9001 quality standards.

### MAXIMUM DURABILITY

The finest raw materials, modern production techniques and a commitment to quality enable ITL to produce and supply inks that will inspire confidence.

- Duplica Digital Pigment inks have outstanding fade, scratch and water resistance.

### MAXIMUM COMPATIBILITY

100% compatible with original inks so printer flushing before converting is not required. Exact colour match - no time consuming RIP or print driver adjustments and no reprofiling. Single use 330ml ink cartridges are installed and used in exactly the same way as originals.

- Wide Media and RIP compatibility.
- Simple to install and easy to use.
- Excellent lamination characteristics.
