ITL-EPS - ROLAND™, MUTOH™, MIMAKI™

PRODUCT OVERVIEW

ITL EPS Solvent based inks are firmly established as the premier solvent inks currently available on the market for solvent-ready printers utilising the Epson™ DX3/DX4 print-head technologies. EPS solvent based inks are a chemically balanced blend of food-grade lactate solvents combined with only the highest quality pigments, offering uncompromised performance and reliability.

The EPS inks give the printer the ability to print photo-realistic images onto uncoated materials that don't rub off or require protective coating. A wide colour gamut enhanced by the option of orange and green produces images with a colour brilliance that has to be seen to be believed.
